ASX Announcement

31th August 2020

Appendix 4D – Supplementary disclosure

As noted in Phoslock Environmental Technologies (“PET”) recent results announcement and release of preliminary accounts (Appendix 4D) for June 30 2020, due to circumstances beyond KPMG’s and PET’s control, KPMG was not able to complete the audit of PET’s businesses in time for the release.

PET is relying on ASIC Relief to extend the lodgement date for its audited or reviewed half year accounts and the other documents required to be lodged with ASIC under section 320 of the Corporations Act.

PET will immediately make a further announcement to the market if it becomes aware that there will be a material difference between its unaudited / unreviewed half year accounts and its audited / reviewed half year accounts.

ABOUT PHOSLOCK ENVIRONMENTAL TECHNOLOGIES LIMITED (PET)

Phoslock Environmental Technologies Limited (ASX: PET) specialises in engineering solutions and water treatment products to remediate polluted lakes, rivers, canals and drinking water reservoirs.

Headquartered in Melbourne, PET has offices in Brisbane, Beijing and Manchester and manufacturing operations based in Changxing, China. PET is represented by licensees, distributors, and agents in ten other countries including SePRO Corporation in the United States and HydroScience in Brazil.

Phoslock® is a proprietary and unique water treatment product that permanently binds excess phosphorus in the water column and sediments, inhibiting the growth of Harmful Algal Blooms (HAB).

Phoslock® is certified to be used in drinking water in North America, Europe, Brazil, Australia and China. Along with Phoslock®, PET also supplies zeolites and specialised strains of bacteria that address water pollution issues.
