ASX ANNOUNCEMENT

27th August 2013

Phoslock secures River Project

Phoslock Water Solutions' (ASX:PHK) has secured a contract totaling \$350,000 for the provision of Phoslock to a Conservation Authority to be applied to a river progressively over the next 12 months.

The Conservation Authority has previously purchased Phoslock for the same project. The objective is to capture phosphate at an important entry point into the river system, reducing the incidence of algal blooms downstream. At this stage no other details can be provided on this project.

ABOUT PHOSLOCK WATER SOLUTIONS LIMITED (PHK)

PHK has worldwide exclusivity for the sale and marketing of *Phoslock*, a technology developed by the Australian government scientific body CSIRO. *Phoslock* removes phosphorus and harmful contaminants and has been applied in over 200 water bodies and used in over 20 countries since it was commercialised in 2005.

PHK is headquartered in Sydney, Australia and has offices in Brisbane, Kunming, China and European Operations (covering Europe, Central & South America) near Bremen, northern Germany. PHK is represented by licensees and agents in ten other countries including SePRO Corporation in the United States.

Phoslock is a certified NSF/ANSI Standard 60 product - North American Drinking Water (see websites ansi.org and scc.ca).

Phoslock Water Solutions is listed on the Australian Stock Exchange (ASX Code: PHK).

For more information about Phoslock Water Solutions and *Phoslock* please visit www.phoslock.com.au or www.phoslock.eu

ABOUT PHOSLOCK – the Product

Phoslock is a unique water treatment product that binds phosphorus from a water body and provides a protective permeable layer to sediments preventing the re-release of phosphorus. Retention of phosphorus deprives algae of nutrients, which improves water quality for human use and aquatic life as well as preventing and controlling Harmful Algal Blooms (HAB).

Phoslock is primarily used as an in water solution for lakes, drinking water reservoirs and other high value recreational water bodies. It is also used as a preventative product to absorb phosphorus before it is transported into water bodies by being applied in storm water basins and inflow channels, rivers and canals.

Phoslock is approved for use in North American Drinking Water Reservoirs via NSF/ANSI Standard 60 Certification. This certifies that *Phoslock* is safe for use in drinking water.
